stay powered. be supported. get ahead.

The Best PDU Just Got Better with the New HDOT Cx

Server Technology's award winning High Density Outlet Technology (HDOT) has been improved with our Cx outlet. The HDOT Cx welcomes change as data center equipment is replaced. The Cx outlet is a UL tested hybrid of the C13 and C19 outlets. HDOT Cx accommodates both C20 and C14 plugs. This innovative design reduces the complexity of the selection process while lowering end costs. With HDOT Cx, you won't have to buy a new set of PDUs when equipment changes.

Ships in 10 Days!

HDOT Cx, Highest Density plus Ultimate Flexibility

Server Technology's original HDOT is our most popular PDU solution. HDOT PDU's can be found in the most demanding data centers worldwide ranging from small technology startups to Fortune 100 powerhouses. With the addition of the Cx outlet customers can now have a PDU that provides the best density in the market and the ultimate flexibility for future equipment updates. Server Technology customers rank us as providing the highest quality PDU's, the best customer support, and most valuable innovation.

Build your HDOT Cx PDU in four easy steps at byopdu.servertech.com

1 Choose Your Type
2 Pick Your Power Options
3 Select Plugs & Outlets
4 Download Datasheet & RFQ
